DATABLEND HR & ERP INTEGRATION FOR CONCUR EXPENSE

datablend

DataBlend is an iPaaS (integration platform as a service) solution designed exclusively to integrate the everyday applications relied on by finance and accounting departments.

Our niche focus allows us to bring value to end-users by automating data workflows, transformations, and uploads that would otherwise be manual and very time consuming. With DataBlend, there are no wait times for data to process, no data errors, and no rushing to close out month end reports.

DataBlend's SAP Concur connector was designed to integrate with ERPs and HRIS/HCM applications although DataBlend has the flexibility to connect any accounting or finance-based application with Concur Expense.

HOW LONG DOES IMPLEMENTATION TAKE?
Standard implementations can be completed within four weeks depending on client responsiveness and number of applications integrated.

SAMPLE AUTOMATED USE CASES FOR AN SAP CONCUR INTEGRATION

Bi-Directional Workflows
- AP Bill Creation (ERP, Concur Expense)
- Departments (Create/Update) (ERP, Concur Expense)
- Projects (Create/Update) (ERP, Concur Expense)
- Users (Create/Update) (ERP, HR, Concur Expense)

Single Direction Workflows
- Expense Attachments load (Concur Expense to ERP)
- Employee Expense Creation (Concur Expense to ERP)

Popular Applications to Integrate with SAP Concur
- Sage Intacct
- Business Central
- Acumatica
- NetSuite
- Workday Adaptive Planning
- HRIS Applications (Vary)
- HCM Applications (Vary)

ABOUT DATABLEND
DataBlend is an Integration Platform-as-a-Service (iPaaS) solution designed exclusively for CFOs, controllers, and their teams. Featuring a no-code, low-code workflow builder, DataBlend allows accounting and finance professionals to create secure and worry-free data integrations. Companies use DataBlend to collect and join data from multiple sources, build workflows (e.g. field to field mapping, pivot tables, and additional data transformations through virtually unlimited custom scripting possibilities), and schedule events so users are never without real-time data access. DataBlend's intuitive interface makes it easy to manage all application integrations from a single platform, eliminating the need to rely on IT resources to manage multiple, point-to-point connections.
